Docker 101

Website: https://jeremycraigmartinez.github.io/docker-101/

(https://jeremycraigmartinez.github.io/docker-101/)

Running the code

These instructions require a unix based operating system

- Mac OS
- Linux

Instructions:

- Unzip code
- Open terminal and navigate to the directory where the code is
 - o cd /path/to/code
- Install nvm (https://github.com/nvm-sh/nvm/blob/master/README.md#installation-and-update)
- Install version of node for project
 - o nvm install 12.3.0
 - o nvm use
- Install node dependencies
 - ∘ npm i
- Start application server
 - o npm start
- In browser, open http://localhost:3000

Visit website

If you don't feel like running the code locally, visit the code in action at https://jeremycraigmartinez.github.io/docker-101/ https://jeremycraigmartinez.github.io/docker-101/)
